

School Year 2019-2020

To all Staff, Students, Parents and Visitors,

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA), which requires schools to be inspected to identify any asbestos containing building materials. Please find listed below the District schools and the results of their inspections. Every three years, school containing asbestos materials must be re-inspected to determine if any known or suspected asbestos-containing building materials (ACBM) have changed and recommendations are made on the managing or abatement of ACBM.

**Educational Facility Name**

**Address**

International Academy of Saginaw  
ACBM Present

1944 Iowa Ave  
Saginaw, MI 48601

The law further requires an Asbestos Management Plan (AMP) to be developed and implemented to monitor any known or inspected ACBM. The plan has several ongoing requirements: Publish notification on management plan availability and the status of asbestos activities; educate and train its employees about asbestos and how to deal with it; notify short-term or temporary workers on the locations of the asbestos containing building materials; post warning labels in routine maintenance areas where asbestos was previously identified or assumed; follow set plans and procedures designed to minimize the disturbance of asbestos containing building materials and survey the condition of these materials every six (6) months to assure that they remain in good condition.

It is the intention of the International Academy of Saginaw to comply with all Federal and State regulations controlling asbestos and to take whatever steps are necessary to ensure students, contractors and employees a healthy and safe environment in which to learn and work. You are welcome to review a copy of the Asbestos Management Plan (AMP) in the school's administrative offices during regular business hours. If you have questions or concerns, please contact Kandi Thomas, designated Asbestos Lead.
